

On page 9, it was noted that the number "96" had been repeated on line 17 instead of setting out the correct number "97". It is therefore requested that the number "96" be replaced by the number "97", line 17, page 9, to bring the specification into accordance with Figure 4 of the drawings

We look forward to receiving confirmation of the filing of the continuation application and the entry of this amendment into the application.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Douglas S. Johnson", with a stylized flourish at the end.
